WHY SNOWFLAKE FOR SUPPLY CHAIN

MAKE DEMAND COUNT. PROTECT PROFITABLE SUPPLY.

Connect retailer demand, promotions and supply on Snowflake to build plans that balance case fill, inventory and margin.

SERVICE
Fulfil retailer demand

MARGIN
Protect net contribution

STOCK
Avoid unproductive inventory

ALIGNMENT
Coordinate with retail partners

THE INDUSTRY CHALLENGE

ORDERS ARE NOT THE WHOLE DEMAND SIGNAL.

Retailer orders can reflect forward buying as well as consumer demand. Promotions change the mix; production and packaging constrain the response. Separate those effects before committing capacity or inventory.

> Plan profitable demand, not just more volume.

CUSTOMER EXAMPLE

Kraft Heinz

Kraft Heinz describes Joint Value Planning with retailers using shared inventory, sales and distribution data on Snowflake: a common basis for decisions. [4]
