FASHION RETAIL

WHY SNOWFLAKE FOR SUPPLY CHAIN

WIN THE SEASON. PROTECT FULL-PRICE MARGIN.

Connect merchandise plans, local demand and inventory on Snowflake. Build in-season decisions around the right style, size and store while time remains to act.

MARGIN
Protect full-price sales

FIT
Improve size availability

CASH
Control stock cover

AGILITY
Act within the season

THE INDUSTRY CHALLENGE

THE RIGHT STOCK. IN THE WRONG PLACE.

Chain-wide stock can hide missing sizes in winning stores. Late intake and disconnected financial plans leave merchants choosing between missed sales today and deeper markdowns tomorrow.

> Manage the season at the level the customer shops: style, size and store.

CUSTOMER EXAMPLE

COACH NEW YORK

Coach used Snowflake-powered analytics to select products for strategic markdowns at a retail event and assess the effect of promotion exclusions. [4]

Published example of markdown analytics.

WHY SNOWFLAKE

ONE PLATFORM. DECISIONS BUILT ON DATA.

Connect financial intent to trading decisions using shared product, inventory and performance data.

DECISION & PLANNING APPLICATIONS
Build merchandise planning, allocation and trading workbenches around your seasons, hierarchies and commercial rules. [1]

AI & ANALYTICAL INTELLIGENCE
Use Snowflake ML for demand and size models; Cortex AI helps merchants explore performance and exceptions. [2]

GOVERNED DATA & COLLABORATION
Unify product, stock and sales. Share selected, read-only data with sourcing and logistics partners. [3]

Models need stockout-aware history and reliable size mappings. Review recommendations and connect approved decisions to merchandise systems.

APPLICATIONS YOU CAN BUILD ON SNOWFLAKE

PLAN THE SEASON. TRADE THE DETAIL.

CONNECT PLAN TO TRADE

Link merchandise financial planning to WSSI (Weekly Sales, Stock & Intake).

DATA
Sales, stock, open orders and financial targets.

MEASURE
Intake variance; stock cover.

ALLOCATE LOCALLY

Match allocation and replenishment to each store's size demand.

DATA
Size profiles, local sales and available stock.

MEASURE
Full-price sell-through; size gaps.

MOVE BEFORE MARKDOWN

Compare transfers, replenishment and markdowns after costs and remaining selling time.

DATA
Stock age, demand, lead times and costs.

MEASURE
Net margin; aged stock.

START WITH ONE DECISION

ONE CATEGORY. A BETTER TRADE.

Use one category and store cluster. Connect its financial plan to WSSI, then compare a transfer, replenishment and markdown decision on expected net margin.
